

# MINNEAPOLIS-SAIN'T PAUL REGION: Property Tax Capacity Per Capita\* by Municipality, 2008

\*Tax capacity in Minnesota represents the property tax revenues that would be generated if each municipality taxed its actual tax base at 100 percent of state-set tax rates for each type of tax base (commercial, residential, etc.). Wisconsin tax capacity was estimated by applying the average total property tax rate (as a percentage of market value) in the Minnesota part of the region to actual market values in Wisconsin municipalities.
